KYLE CERVANTES
STUDENT

ABOUT ME

I am a dedicated and inspired student currently pursuing my education with the interest in both software and mobile development. I am eager to learn, improve my skills and gain real-world experience. I enjoy working both independently and in teams, and always strive to give my best in everything I do.

Outside of coding, I have a deep appreciation for design, enjoy exploring emerging technologies, and engage in creative hobbies that fuel my problem-solving mindset. I also find strength and balance through my faith—attending church and taking time to pray helps keep me grounded and inspired. Always open to new challenges, I'm committed to growing both as a developer and as a person.

EXPERIENCE

North Eastern Mindanao State University - Main Campus   2022-2024
Programmer

During my first and second years in college, we developed a **Barangay Information System** in Tago, Surigao del Sur, as part of our final project. This project aimed to provide and digitize the management of barangay records, including resident information, certificates, and incident reports. I contributed to both the front-end and back-end development, working with my team to design user-friendly interfaces and implement core functionalities. Through this experience, I gained hands-on knowledge in system planning, database management, and collaborative development—laying a strong foundation for my passion in building practical and impactful software solutions.

North Eastern Mindanao State University - Lianga Campus   2024-2025
Programmer

Now in my third year of college, we are developing a Barangay GIS Health Management Website and a Community Bulletin Mobile App. The website maps health data like facility locations, reported illnesses, and demographics to support data-driven decisions. The mobile app delivers real-time announcements, health tips, and alerts to residents. I'm actively involved in both design and development, gaining hands-on experience in full-stack development, data visualization, and building tech solutions for community needs.

EXPERTISE

- Web Development
- Mobile Applications
- Design Software
- Coding

LANGUAGE & FRAMEWORKS:

- HTML, JAVASCRIPT, PYTHON, PHP, FLUTTER, REACT, NEXTJS, TAILWIND CSS

TOOLS & PLATFORMS

- Github, Supabase, Firebase, Mysql, VS Code, Postman, Git

LANGUAGE

English

Filipino

EDUCATION

2022 - Present

North Eastern Mindanao State University

BS - Computer Science

Specialized in web and mobile application development with focus on modern frameworks and programming languages.

2016 - 2021

Lianga National Comprehensive High School

Secondary - Senior High School

It focuses on developing essential skills such as critical thinking, problem-solving, communication, and collaboration, which are crucial for future academic and professional success.

2009 - 2015

Lianga Central Elementary School

Primary School

Foundational skills and early education.
